DETAILED ACTION

Response to Arguments

1. Claims 1, 14 and 23 are pending.

Claims 1, 14 and 23 are examined on the merits.

2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Maintained Grounds of Rejection

Claim Rejections - 35 USC § 102

3. The rejection of claims 1, 14 and 23 under 35 U.S.C. 102(e) as being anticipated by WO200270539 A2 (filed March 5, 2002/ IDS reference 2, April 15, 2001) is maintained.

Applicants assert that the subject matter of the pending claims is novel and have submitted a declaration under 37 C.F.R. 1.131 on December 10, 2004 in hopes of antedating the filing date of the cited reference. "According to the declaration, Applicants were in possession of the claimed subject matter prior to the filing date of the priority document", see page 4 of the Remarks submitted December 10, 2004. Furthermore, all the inventors have not signed the declaration, particularly Arthur B. Raitano, see MPEP 715.04, section bridging column 2 and column 1 of pages 700-228 and 700-229, respectively. These arguments and the declaration have been carefully

Art Unit: 1642

reviewed, but found unpersuasive. Accordingly, the said declaration filed under 37 CFR 1.131 has been considered but is ineffective to overcome the prior art reference.

The evidence submitted is insufficient to establish a conception of the invention prior to the effective date of the prior reference. While conception is the mental part of the inventive act, it must be capable of proof, such as by demonstrative evidence or by a complete disclosure to another. Conception is more than a vague idea of how to solve a problem. The requisite means themselves and their interaction must also be comprehended. See *Mergenthaler v. Scudder*, 1897 C.D. 724, 81 O.G. 1417 (D.C. Cir. 1897). Applicants must provide a showing of facts to establish reduction to practice prior to the effective date of the reference, or conception of the invention prior to the effective date of the reference coupled with due diligence from prior to said date to a subsequent reduction to practice or to the filing of the application. Original exhibits of drawings or records, or photocopies thereof, must accompany and form part of the affidavit or declaration or their absence satisfactorily explained.

The evidence submitted is insufficient to establish diligence from a date prior to the date of reduction to practice of the WO reference to either a constructive reduction to practice or an actual reduction to practice.

In the instant case Applicants have not provided scientific or sufficient evidence substantiating the assertion they were in possession of the claimed subject matter prior to the filing date of the WO document. Accordingly, the rejection is maintained for reasons cited above and of record in the Detailed Action mailed October 4, 2004. Applicants are requested review MPEP 715 and the section therein.

Double Patenting

4. The provisional rejection of claims 1, 14 and 23 under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1, 12-17, 19, 21, 26, 51 and 52 of copending Application No. 10/099,460 (filed March 13, 2002) is maintained.

Applicants acknowledge the rejection and will submit a terminal disclaimer at the appropriate time when either the present case or copending application is placed in condition for allowance. This response has been considered, but found unpersuasive. Until Applicants executes one of the cited two choices this rejection is maintained.

5. Claims 1, 14 and 23 continue to be directed to an invention not patentably distinct from claims 1, 12-17, 19, 21, 26, 51 and 52 of commonly assigned co-pending application 10/099,460 (filed March 13, 2002). Specifically, both sets of claims read on identical nucleotide sequences and the encoded polypeptide sequence.

6. As set forth in the Action mailed October 4, 2004, the U.S. Patent and Trademark Office normally will not institute an interference between applications or a patent and an application of common ownership (see MPEP § 2302). Commonly assigned 10/099,460 (filed March 13, 2002), discussed above, would form the basis for a rejection of the noted claims under 35 U.S.C. 103(a) if the commonly assigned case qualifies as prior art under 35 U.S.C. 102(e), (f) or (g) and the conflicting inventions

Art Unit: 1642

were not commonly owned at the time the invention in this application was made. In order for the examiner to resolve this issue, the assignee can, under 35 U.S.C. 103(c) and 37 CFR 1.78(c), either show that the conflicting inventions were commonly owned at the time the invention in this application was made, or name the prior inventor of the conflicting subject matter.

A showing that the inventions were commonly owned at the time the invention in this application was made will preclude a rejection under 35 U.S.C. 103(a) based upon the commonly assigned case as a reference under 35 U.S.C. 102(f) or (g), or 35 U.S.C. 102(e) for applications filed on or after November 29, 1999.

Conclusion

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 1642

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
